## HISTORY

**IN THE MAKING**

Armen Garo Gunjian’s American Dream started its journey at a hardware store with his first job in sales. Always the student and eager to learn everything about everything, he made it his priority to study the products he was selling in order to place the right ones into the hands of the right customers.

In time, with the tools of knowledge and salesmanship he had much gathered, he set out on his own, selling them door-to-door. And as those doors opened, Armen listened to his customers and always strived to fully satisfying their specific needs.

After many years of experience in this school of hard knocks, one particular item in his arsenal, was just not quite right to his standards and Armen got the idea to revolutionize it, setting forth making it himself.

In 1976, Brushtech Inc. was founded. Launching a new design twist on the much sought after Battery Brush. Next came a BBQ brush patent, followed by 400+ additionally “Unique and Unusual Hard-to-Find Specialty Brushtech Brushes.” All made to this day with pride and excellence in the United States of America.

Our humble forty plus year manufacturing company serves the world over and beyond… with its innovative designed brushes. One of our latest, even up in the International Space Station. We’re just saying…
